

LayerTracer

The letter 'y' in 'Layer' is stylized in blue. It features two grey lines representing seismic ray paths. One ray starts at a blue dot above the first stroke of the 'y', goes down, and reflects off a horizontal grey bar. The other ray starts at an orange dot above the second stroke of the 'y', goes down, and reflects off the same bar. Both rays then continue downwards. The horizontal bar is grey and spans the width of the 'y'.
